

Pet Adoption Game

1. Introduction

The Pet Adoption Game is a console-based application that simulates the experience of adopting and taking care of a pet. Users can adopt a pet, feed it, play with it, and check its status. The game tracks the pet's hunger and happiness levels, and it ends if these levels drop to critical values.

2. System Overview

The game provides the following functionalities:

1. Adopt a Pet: Start the game by adopting a pet.
2. Feed the Pet: Increase the pet's hunger level by feeding it.
3. Play with the Pet: Increase the pet's happiness level by playing with it.
4. Check Status: View the current hunger and happiness levels of the pet.
5. End Game: End the game and view the final status of the pet.

3. Features and Functionality

3.1. Adopt a Pet

Purpose: To start the game by adopting a pet.

Process:

- Name: Enter the name of the pet. This name will be used to identify the pet throughout the game.
- Initial Levels: Set the initial hunger and happiness levels to 50 each.
- Confirmation: The system confirms that the pet has been adopted and is ready to be cared for.

3.2. Feed the Pet

Purpose: To increase the pet's hunger level by feeding it.

Process:

- Increase Hunger: If the pet's hunger level is below 90, feeding it will increase the hunger level by 10.
- Full Condition: If the hunger level is already at 90, the pet is considered full, and no further increase is allowed.

3.3. Play with the Pet

Purpose: To increase the pet's happiness level by playing with it.

Process:

- Increase Happiness: If the pet's happiness level is below 90, playing with it will increase the happiness level by 10.
- Satisfaction Condition: If the happiness level is already at 90, the pet is considered too happy, and no further increase is allowed.

3.4. Check Status

Purpose: To view the current status of the pet.

Information Provided:

- Hunger Level: Displays the current hunger level of the pet.
- Happiness Level: Displays the current happiness level of the pet.

3.5. End Game

Purpose: To end the game and view the final status of the pet.

Process:

- Final Status: The system shows the final hunger and happiness levels before ending the game.
- Game Over: The game ends, and the user is informed that the game is over.

4. How to Use

1. Using the Menu:

- Adopt Pet: Choose this option to adopt a new pet. Enter the pet's name when prompted.
- Feed Pet: Select this option to feed the pet and increase its hunger level.
- Play with Pet: Choose this option to play with the pet and increase its happiness level.
- Check Status: Use this option to view the pet's current hunger and happiness levels.
- End Game: Select this to end the game and view the final status of the pet.

2. Example Workflow:

- Adopt: Adopt a pet named "Buddy". The pet's hunger and happiness are set to 50.
- Feed: Feed "Buddy" to increase its hunger level.
- Play: Play with "Buddy" to increase its happiness level.
- Check Status: Check "Buddy"'s current hunger and happiness levels.
- End: End the game and see "Buddy"'s final status.

5. Troubleshooting

- Invalid Actions: Ensure that actions like feeding and playing are only performed after adopting a pet. The system will prompt you if no pet has been adopted.
- Critical Levels: If the pet's hunger or happiness levels drop to zero or below, the game ends. Ensure to regularly feed and play with the pet to maintain its well-being.

Sample Output

```
1. Adopt Pet
2. Feed Pet
3. Play with Pet
4. Check Status
5. End Game
Choose an option: 2
Pet has been fed.
