About Us

Who is NeuronetiX?

NeuronetiX is a pioneering force in the realm of virtual programming education, revolutionizing the way individuals engage with technology and software development. Established in 2023, our company boasts a dynamic curriculum tailored to cater to diverse interests and skill levels, offering a plethora of programming courses across various fields. Through cutting edge virtual platforms like Zoom and Teams, we seamlessly connect learners with industry experts, fostering an immersive and interactive learning environment where knowledge knows no bounds.

Our Mission:

At NeuronetiX, our vision is simple yet profound: to democratize access to programming education. We firmly believe that passion for coding should never be hindered by financial constraints. That's why we are committed to offering our courses at competitive prices, ensuring that anyone with a desire to learn programming can do so without breaking the bank. By eliminating barriers to entry, we empower individuals from diverse backgrounds to pursue their dreams and unleash their full potential in the tech industry.

Internship Overview & Guidelines

Internship Process Overview

Wee k.no	Tasks	Session Mentor	Start	End
week 1	Project 1	Friday 16/8	15/8/2024	21/8
week 2	Project 2 Basics	Friday 23/8	22/8	28/8
week 3	Project 3 Basics	Friday 30/8	29/8	4/9
week 4	Project 4 OOP	Friday 6/9	5/9	11/9
week 5	Project 5 OOP	Friday 13/9	12/9	18/9
week 6	Project 6 OOP	Friday 20/9	19/9	25/9
Week 7	Finishing The internship and Closing	Friday 26/9	26/9	30/9

Internship Guidelines

General Tasks Requirements:

For each project, please follow these guidelines:

1. **Implement a Java Program:** Develop a clean and simple Java program for the assigned project.
2. **Task Division:** Divide tasks among team members based on strengths and expertise.
3. **Code Quality:** Ensure code is clean, readable, and well-documented.
4. **File Management:** Upload all project files and documentation to the designated drive, organized appropriately.
5. **Review and Feedback:** Participate in code reviews and make necessary improvements based on feedback.

What will you learn?

Internship Outcomes

1. **Problem-Solving Skills:** Tackle intermediate-level projects that integrate basic and OOP concepts.
2. **Code Design and Architecture:** Learn to design and structure code effectively, focusing on best practices and design patterns.
3. **Debugging and Testing:** Enhance debugging skills and learn to test code for correctness and reliability.
4. **Project Management:** Manage project requirements, deadlines, and deliverables.
5. **Collaboration:** Gain experience collaborating with team members, including sharing code, reviewing peers' work, and integrating contributions.
6. **Communication:** Develop effective communication skills for discussing project requirements, progress, and challenges.
7. **Feedback and Iteration:** Participate in team reviews, provide and receive feedback, and iteratively improve project outcomes.

Project -Week 1

General Tasks Requirements:

For each project, please follow these guidelines:

1. **Implement a JAVA Program:** Develop a clean and simple Java program for the assigned project.
2. **Task Division:** Divide tasks among team members based on strengths and expertise.
3. **Code Quality:** Ensure code is clean, readable, and well-documented.
4. **File Management:** Upload all project files and documentation to the designated drive, organized appropriately.
5. **Review and Feedback:** Participate in code reviews and make necessary improvements based on feedback.
